

Solutions for the defence and security sector

Traction, lifting & lashing

Traction chains

pewag traction chains

reliable, robust, secure

pewag traction chains for military vehicles.

Innovative solutions for varying challenges.

The traction chain product range made of special alloy steel, combined with wear bars, offers improved wear resistance and service life, as well as outstanding driving characteristics allowing the vehicle to be driven at higher speeds. pewag traction chains guarantee security and reliability even in the most severe conditions. The lower chain weight ensures easy handling and storage.

Our products are the preferred and certified brand of NATO and other countries and are listed with NATO stock numbers.

In co-operation with the leading manufacturers of military vehicles, pewag is also engaged in customizing traction solutions that will meet your specific requirements.

Lashing chains

pewag winner pro load lashing systems for load restraint applications

Our lashing systems provide safe transport of equipment for land-, air-, and water transport.

Ergonomical design, easy handling even under harsh conditions. Robust, reliable, little maintenance, deep temperature resistant.

pewag winner PRO

Lashing chain

Lashing chain with integrated shortening device. Weight optimized using Grade 12 chain and components meets AMOV-P4 requirements and EN 12195-3. pewags shortest possible lashing chain with a lashing capacity of 10000 daN.

Lifting systems

pewag profilift lifting points

The new and high quality lifting points are the ideal accessory to complement pewag's winner chain program and enhances the possibilities of its use considerably.

With this latest product-line, pewag has enhanced its growth potential. Naturally, pewag winner profilift lifting points fulfill the highest quality standards and offer maximum safety.

All pewag profilift lifting points can also be used as lashing points. Thus the permissible tensile force is the duplicate of the nominal load capacity, as in case of the tie-down the safety factor is 2.

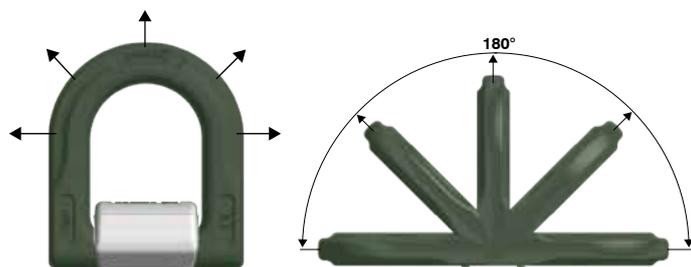

pewag profilift

pewag profilift

Product description

High-tensile eyebolts pewag winner profilift, for welding onto machine parts or vehicle bodies. Ideal for hanging of lifting and lashing parts. Due to the integrated spring, the ring will be kept in each requested position.

Permissible load directions

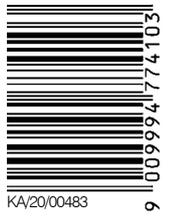

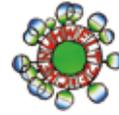

pewag STANAG

Product description

High-tensile pewag STANAG Load Rings for welding on military equipment like vehicles, trailers,... Ideal for lifting and lashing, even under harsh conditions. The integrated spring will keep the ring in each requested position.

- Working temperature range: -40°C to +200°C
- Integrated spring
- Standard marking: STANAG 4062 / LC [daN]
STANAG 3548 / Capacity [lbs]
- Customized marking: if required
- Customized coating: if required
- Manual and Welding instructions
- Comply with EN 1677-1

pewag defence division

Your partner for special military solutions:

Customized traction solutions:

robust, weight optimized, easy handling excellent performance on snow, ice and off-road!

Logistic solutions for lashing and lifting:

We provide complete lashing, lifting calculations, training and have the right hardware for each task. Our systems are deep temperature resistant.

We are focused on our soldiers needs to support their duty in the best way.
